

PROACTIVE ECOSYSTEM · OVERVIEW

The ProActive Ecosystem

A cybersecurity-first managed IT model for stable operations, protected users and strategic technology ownership.

The ProActive Ecosystem is Digerati Experts' cybersecurity-first managed IT model. It is built for companies that want more than reactive support tickets, and combines user support, secure access, device and workplace operations, backup, network and security controls, reporting and strategic guidance, depending on the level of coverage selected.

In brief

- 1**

One model, four operating depths.

IT, Office, Business and Enterprise all include the DE Security Foundation; they differ in operating depth, not quality.
- 2**

Standalone when one role is enough.

Standalone services solve one clearly defined technology role. The Ecosystem is for broader IT and security ownership.
- 3**

Published starting points, assessed scope.

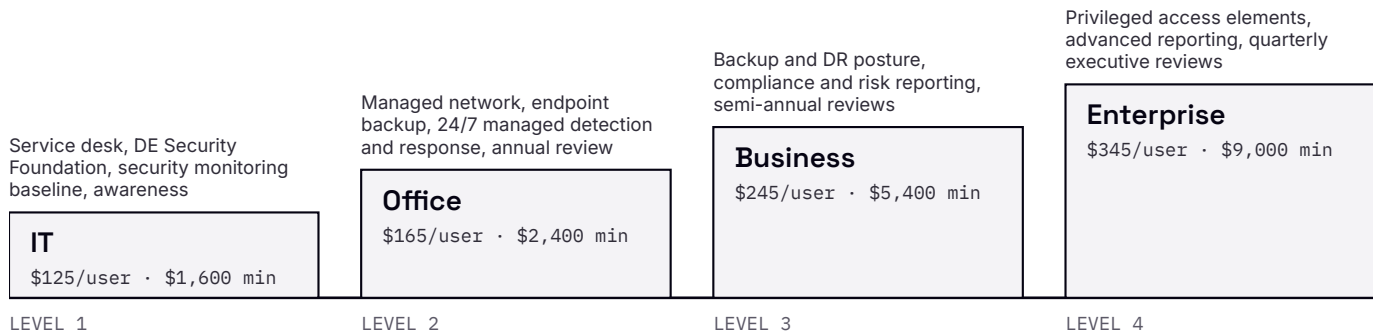

Rates are starting-at guidance; the Cyber Risk Assessment confirms the right level and final pricing.

01 Coverage levels

LEVEL	BEST FIT	TYPICAL FOCUS	FROM / MIN
ProActive IT	Businesses that need core managed IT and security direction.	Foundational support, endpoint visibility, DE Security Foundation, security awareness and a documented baseline.	\$125 / \$1,600
ProActive Office	Teams that need secure workplace operations.	Users, devices, productivity platforms, managed network, endpoint backup and 24/7 managed detection and response.	\$165 / \$2,400
ProActive Business	Companies that need stronger protection and leadership reporting.	Backup and DR posture, user cloud backup, enhanced threat detection, security awareness training, compliance and risk reporting, semi-annual reviews.	\$245 / \$5,400
ProActive Enterprise	Complex, multi-site or compliance-driven organizations.	Advanced or custom security, compliance reporting, business continuity, quarterly planning and audit-grade evidence.	\$345 / \$9,000

Rates per user per month / monthly minimum.

02 Operating depth at a glance

Labels name items from each level's published inclusions. Rates are per user per month, with monthly minimums. Levels describe operating depth, not a ranking.

03 Standalone or Ecosystem

Standalone services solve one clearly defined technology role. The ProActive Ecosystem is for broader IT and security ownership, where Digerati Experts guides the overall stack, risk posture and operating model.

04 Common add-on areas

- UCaaS voice and meetings
- Co-managed IT support for internal teams
- Compliance reports and evidence collection
- Security awareness training
- Network and secure access modernization
- Backup and BCDR expansion

Public pricing is starting-at guidance, not a quote. Final pricing depends on users, endpoints, sites, compliance requirements, backup scope, existing technology condition and selected add-ons; your Cyber Risk Assessment confirms final scope. This document names no customers and makes no vendor-specific claims.
