

Quarterly Business Review

How Digerati Experts reviews technology health, security posture, support trends, projects, budget items and **next-quarter priorities**.

EXAMPLE · NOT CLIENT DATA

WHAT A QBR IS FOR

The QBR keeps technology decisions connected to business outcomes: risk, reliability, employee experience, upcoming projects, budget planning and the decisions that keep the business moving securely.

Instead of only reviewing tickets, the conversation focuses on what leadership needs to decide.

CADENCE

Twice a year

ProActive Business

Quarterly

ProActive Enterprise; by scope for strategic clients

Three things to know

1

Decisions, not ticket counts.

The conversation centers on risk, reliability, budget and the decisions leadership needs to make.

2

Five agenda blocks.

Summary, support trends, security posture, backup readiness and projects and lifecycle.

3

Cadence follows the level.

Semi-annual in ProActive Business, quarterly in ProActive Enterprise.

01 Who it is for

TOPIC	DETAIL
Best fit	Clients in ProActive Business, ProActive Enterprise or strategic engagements that need recurring planning and leadership visibility.
Primary outcome	A structured business review that turns IT and security activity into priorities, decisions and a practical roadmap.
Engagement type	Semi-annual in ProActive Business; quarterly in ProActive Enterprise; available by scope for strategic clients.

02 Review cadence by level

03 Sample agenda

- 01 Executive summary and major changes since the last review.
- 02 Support trends, recurring issues and employee experience observations.
- 03 Security posture update, major risks and remediation progress.
- 04 Backup and BCDR readiness and recovery posture.
- 05 Project status, lifecycle items and upcoming decisions.

04 Example metrics to include

- Ticket volume and response pattern by category.
- Endpoint health, patching posture and device lifecycle status.
- Security awareness participation and phishing risk indicators.
- Backup completion trends and restore testing status.
- Open risks, accepted risks and remediation deadlines.

EXAMPLE

Metric categories only. This sample shows no values, because none would be real.

06 How Digerati Experts uses the QBR

- To keep the client roadmap active and practical.
- To document decisions, tradeoffs and accepted risks.
- To connect IT operations, security, compliance and budget planning in one leadership conversation.

05 Decisions the QBR should drive

- Which risks need budget now versus later.
- Which systems or devices should be replaced before failure.
- Which policies, access changes or user controls need approval.
- Which projects should be scheduled for the next quarter.

07 Typical deliverables

- QBR agenda
- Executive summary page
- Risk and project roadmap
- Budget and action list
- Decision log for leadership follow-up

NEXT STEP

Choose your review cadence

Use this sample to decide what reporting cadence your organization needs, then schedule an assessment to confirm the right QBR scope.
