

INFRASTRUCTURE ADD-ON

UCaaS: Voice & Meetings

Unified phone, meetings, messaging and communications support for businesses that need reliable voice and collaboration inside a managed IT strategy.

UCaaS / Voice & Meetings is offered as an infrastructure add-on when clients need a better communications platform. Digerati Experts helps align business phone, meetings, user access, device readiness, number planning and support workflows with the broader IT and security environment.

ENGAGEMENT MODEL

Infrastructure add-on

For ProActive Ecosystem clients or scoped standalone projects.

BEST FIT

Businesses replacing legacy phones, consolidating communication tools, opening new offices or standardizing user calling and meetings.

PRIMARY OUTCOME

A cleaner communications environment with better user experience, supportability and lifecycle management.

01 Core planning areas

AREA 01

Call flow mapping

User and department call flows.

AREA 02

Numbers and porting

Number inventory, porting readiness and phone assignment.

AREA 03

Meetings and collaboration

Meeting and collaboration requirements.

AREA 04

Network readiness

Review for voice quality and reliability.

02 What this service is for

- Replacing fragmented phone and meeting tools with a more supportable environment.
- Helping employees communicate from office, remote and mobile work contexts.
- Aligning communication tools with identity, device readiness, onboarding and offboarding.

03 Security and lifecycle

- User access managed through defined onboarding and offboarding workflows.
- Administrative access limited, documented and protected.
- Departing employees lose access to communication systems as part of standard offboarding.

04 Where it fits

- An optional infrastructure add-on when clients build a package.
 - Useful during office moves, new site launches, phone replacement or collaboration platform cleanup.
 - Can be paired with Managed Network & Connectivity and Managed Workplace for stronger operational results.
-

05 Typical deliverables

- Voice and meeting requirements map
 - User and extension planning sheet
 - Number and call flow checklist
 - Implementation roadmap
 - Support and lifecycle recommendations
-

NEXT STEP

Schedule a Cyber Risk Assessment

Confirm the right service level, required controls and implementation roadmap for your environment.
