

ProActive IT

The decision: is ProActive IT the right starting level for your business, and when would you move beyond it?

BOTTOM LINE

Essential managed IT with the DE Security Foundation included, for smaller, less complex environments that need professional technology ownership without a large internal IT burden.

ProActive IT is the starting point of the ProActive Ecosystem. It replaces reactive break-fix support with one accountable partner for users, devices, access and support, and establishes a documented, security-first baseline before the business expands into deeper workplace, backup, security operations and compliance programs.

STARTING POINT

\$125

per user / month

\$1,600

monthly minimum

Three things to know

1

Security is included from day one.

The DE Security Foundation and a managed endpoint, identity, email and monitoring baseline are part of ProActive IT.

2

Backup and 24/7 detection start one level up.

Endpoint backup and 24/7 managed detection and response begin in ProActive Office.

3

The assessment sets the scope.

Published rates are starting points; your Cyber Risk Assessment confirms the right level and final pricing.

Fit check

ProActive IT fits when you want to

- Replace purely reactive IT support with a stable managed model.
- Establish ownership of users, endpoints, access, patching and support flow.
- Give leadership one accountable partner for day-to-day IT direction and risk reduction.
- Smaller, less complex environments that need essential protection and a documented baseline.

Look at ProActive Office when

- Onboarding and productivity platforms need to be managed for you.
- The office network should be professionally managed.
- Endpoint backup should be included, not added.
- 24/7 managed detection and response becomes important.

What you get

- ✓ **Service desk and issue ownership.** Triage and coordination for covered users.
- ✓ **DE Security Foundation.** Included at every ProActive level.
- ✓ **Managed security baseline.** Endpoint, identity, email and security monitoring baseline.
- ✓ **Security awareness.** Awareness and phishing resilience for users.
- ✓ **Documented environment.** Users, devices and access recorded as the operating baseline.
- ✓ **Upgrade path.** A clear route into ProActive Office as needs grow.

What you do not get at this level

- ✗ **Backup program.** No default backup program at this level. Endpoint backup begins in ProActive Office.
- ✗ **24/7 managed detection and response.** Begins in ProActive Office; available to ProActive IT clients only as a separately scoped addition.
- ✗ **Compliance reporting.** Audit-grade documentation is handled in higher tiers or standalone engagements.

The four levels side by side

	THIS BRIEFING IT	Office	Business	Enterprise
RATE	\$125 per user / month	\$165 per user / month	\$245 per user / month	\$345 per user / month
MINIMUM	\$1,600 / month	\$2,400 / month	\$5,400 / month	\$9,000 / month
FOCUS	Visibility and essential control	Managed daily workplace, endpoint backup, 24/7 MDR	Backup and DR posture, compliance and risk reporting	Multi-site, regulated, quarterly executive reviews
MOVE UP WHEN	Starting level	Onboarding, productivity platforms, managed network, endpoint backup and 24/7 detection and response become important.	The organization needs backup and disaster recovery posture, compliance and risk reporting, and semi-annual planning reviews.	Multiple sites, regulated data, advanced compliance reporting or quarterly executive reviews are required.

What leadership receives

Managed IT operating baseline	User and device inventory direction	Support escalation path
Initial Cyber Risk Assessment findings	Recommended roadmap for add-ons and tier movement	

RECOMMENDATION
