

CLIENT PORTAL · COMPANY AGREEMENT

Client Portal Terms, Legal Disclaimers and Rules of Engagement

How Digerati Experts and your company work together through the Client Portal: who may act for the company, how a request becomes work, what the portal is and is not, and the legal terms that apply.

LAST MODIFIED
October 9, 2026

VERSION
2026.10

SIGNED BY
One authorized person, once, for the whole company.

WORKS WITH
Your Master Services Agreement and any Statement of Work.

01 Parties and order of precedence

These terms are between **Digerati Experts** ("DE", "we", "us") and the company named on the portal account ("Client", "you"). They govern use of the Client Portal at portal.digeratiexperts.com and its related apps (the "Portal").

- 01 Your signed **Master Services Agreement (MSA)**, and any Statement of Work, Order Form or Service Level Agreement made under it, control the services DE delivers. If these terms conflict with them, the MSA and its documents win.
- 02 If you have no signed MSA, the website **Terms of Use** at digeratiexperts.com/legal/terms-of-use apply alongside these terms.
- 03 The **Client Portal Acceptable Use Policy** applies to every person who signs in. Each user accepts it for themselves.

02 Who may act for the company

The person who signs these terms confirms that they are authorized to bind the Client. The Client decides who has portal access and is responsible for what its users do in the Portal.

- **Company IT contacts and org admins** may approve purchases, change people and access, accept quotes and sign for the company where the Portal offers it.
- **Managers** may approve requests for their teams within the approval rules your company sets.
- **Staff** may open tickets and requests for themselves and see their own records.
- Tell us promptly when someone joins, changes role or leaves. Until you do, DE may rely on instructions from any active account with the right role.

03 Rules of engagement

How work moves between your team and ours.

-
- 01 **The Portal is the system of record.** A ticket or request opened in the Portal, by email to support or by phone is logged and tracked here. Chats, texts or messages to an individual engineer are not a request until they are logged.
-
- 02 **Emergencies are called in.** For an outage, a suspected security incident or anything urgent, call DE. Do not rely on a portal ticket alone to report an emergency.
-
- 03 **Response and resolution targets** are the ones in your SLA or Statement of Work. The Portal shows status; it does not change those targets.
-
- 04 **Approvals mean authorization.** Approving a quote, order, purchase, licence or change in the Portal authorizes DE to carry it out and to bill for it as your agreements allow.
-
- 05 **Out-of-scope work is quoted first.** If a request falls outside your agreements, DE tells you and gets your approval before billable work begins, except where an emergency response is needed to protect your systems.
-
- 06 **Security changes need a verified requester.** Password resets, MFA changes, new access and offboarding are carried out only for a requester DE can verify, and we may call back before acting.
-
- 07 **Be specific and keep us informed.** Describe the problem, who is affected and how to reach you. Reply to questions on your tickets so work is not left waiting.
-
- 08 **Respect on both sides.** DE staff will treat your people professionally, and we ask the same. DE may restrict an account used to harass or abuse staff.
-

04 Your information

- Information you put in the Portal stays yours. DE uses it to deliver and support your services, as described in your MSA, any Data Processing Addendum and our Privacy Policy.
 - The Portal records activity (sign-ins, approvals, signatures, changes) for security and as a record of what was authorized. Those records may be used to resolve a dispute about what was requested or approved.
 - Do not upload information you are not allowed to share with DE, or regulated data (such as health or payment card data) unless your agreements cover it.
-

05 Legal disclaimers

- 01 **Information, not advice.** Articles, reports, scores, recommendations and roadmaps in the Portal are provided to help you make decisions. They are not legal, tax, financial or compliance advice, and they do not certify that you meet any law, regulation or framework.
-
- 02 **Sample and preview content.** Some Portal pages show sample content until a service is live for your company; they are labelled as samples. Sample content does not describe your environment.
-
- 03 **Third-party services.** The Portal links to or shows data from third-party products (for example ticketing, billing, phone, backup and security tools). Those products are governed by their own terms; DE does not control their availability or accuracy.
-
- 04 **Availability.** DE aims to keep the Portal available but does not guarantee it will be uninterrupted or error-free. Portal availability is not a service level unless your SLA says so. If the Portal is down, contact DE by phone or email.
-
- 05 **As provided.** Except for what your MSA or SLA expressly commits to, the Portal is provided as is and as available, without warranties of any kind, to the fullest extent the law allows.
-
- 06 **Liability.** Limitations of liability, indemnities, governing law and dispute resolution are those in your MSA. Without an MSA, the website Terms of Use govern them.
-

06 Changes, suspension and signatures

- DE may update these terms. When we do, the Portal asks an authorized person to review and sign the new version before the company continues to use it. The version and date are shown at the top of this document.
 - DE may suspend an account that puts your company, DE or other clients at risk, and will tell your company IT contact why.
 - Typing your name and selecting **Sign Agreements** in the Portal is an electronic signature with the same effect as a handwritten one. DE records the signer, time, version and a fingerprint of this document, and you can ask us for a copy.
