

PROACTIVE ECOSYSTEM · LEVEL 1 OF 4

ProActive IT

Essential managed IT with the DE Security Foundation included, for smaller, less complex environments that need professional technology ownership without a large internal IT burden.

ProActive IT is the starting point of the ProActive Ecosystem. It replaces reactive break-fix support with one accountable partner for users, devices, access and support, and establishes a documented, security-first baseline before the business expands into deeper workplace, backup, security operations and compliance programs.

PUBLISHED STARTING RATE

\$125

per user / month

\$1,600 monthly minimum

BEST FIT

Smaller, less complex environments that need essential protection and a documented baseline.

PRIMARY OUTCOME

A managed baseline for users, devices, support and security hygiene.

01 Purpose

- Replace purely reactive IT support with a stable managed model.
- Establish ownership of users, endpoints, access, patching and support flow.
- Give leadership one accountable partner for day-to-day IT direction and risk reduction.

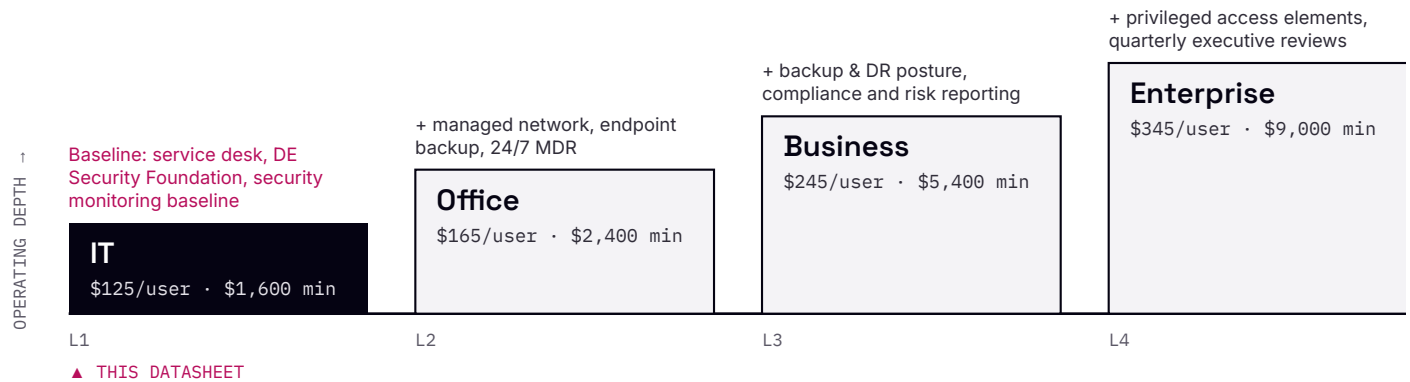

02 Typical deliverables

- Managed IT operating baseline
- User and device inventory direction
- Support escalation path
- Initial Cyber Risk Assessment findings
- Recommended roadmap for add-ons and tier movement

03 Scope at this level

CAPABILITY	STATUS	DETAIL
Service desk and issue ownership	● Included	Triage and coordination for covered users.
DE Security Foundation	● Included	Included at every ProActive level.
Managed security baseline	● Included	Endpoint, identity, email and security monitoring baseline.
Security awareness	● Included	Awareness and phishing resilience for users.
Documented environment	● Included	Users, devices and access recorded as the operating baseline.
Upgrade path	● Included	A clear route into ProActive Office as needs grow.
Endpoint backup	○ Not included	No default backup program at this level. Begins in ProActive Office.
24/7 managed detection and response	⦿ Scoped add-on	Begins in ProActive Office; added to ProActive IT only by separate scope.
Compliance reporting	○ Not included	Audit-grade documentation sits in higher tiers or standalone engagements.

04 Where ProActive IT sits

Published starting rates per user per month, with monthly minimums. Levels describe operating depth, not a ranking; the Cyber Risk Assessment recommends the fit.

05 Move-up triggers

MOVE TO	WHEN
ProActive Office	Onboarding, productivity platforms, managed network, endpoint backup and 24/7 detection and response become important.
ProActive Business	The organization needs backup and disaster recovery posture, compliance and risk reporting, and semi-annual planning reviews.
ProActive Enterprise	Multiple sites, regulated data, advanced compliance reporting or quarterly executive reviews are required.

06 How an engagement starts

STEP 01	STEP 02	STEP 03	STEP 04
Cyber Risk Assessment Finds risk, gaps and current conditions.	Written recommendation One of four ProActive models, with scope.	Onboarding Access, inventory and baseline established.	Ongoing operations Support, security baseline and reviews.

NEXT ACTION Schedule a Cyber Risk Assessment Confirm the right service level, required controls and implementation roadmap for your environment.	digeratiexperts.com/book 325-480-9870 info@digeratiexperts.com
---	---

Published rates are starting points, not quotes. Final pricing depends on users, endpoints, locations, infrastructure, backup requirements and security and compliance scope; your Cyber Risk Assessment confirms final scope. This datasheet names no customers and makes no vendor-specific claims.
